

The Paragon Project

Downloading the MP3 Audio Files:

For your convenience we have split the TNB package into two separate downloads; one including all of the PDF files (E-Books, WOW Styles and Style Planners) and the other containing all of the MP3 audio files. We made this choice because the audio files are very large in size (megabytes) in comparison to the PDF files, so containing everything in one ZIP download would just make the wait longer for you before you can begin reading.

With the package split in half, you can download the PDF files relatively quickly (which you've already done), and then use this page to start downloading the audio files. Once you do that, you can begin reading TNB while waiting for the large audio package to download.

The audio package will always be available at the below link, so don't feel pressured to download it right now if you don't want to. You can download it at your leisure anytime.

Click the below link to begin your download (50+ megabytes):

[~ Download TNB Audio Package ~](#)

Please note: *During peak hours and other times when we are experiencing a heavy amount of web traffic (primarily during a sale or special promotion), the audio package download may be slow for some users because too many people are connected and/or downloading at the same time. If the download is either slow or not working, please try again later.*

Enjoy!
