

WOW Style Planner (basic)

This worksheet is designed to be used with the Paragon Project's Wheel of Wooing (WOW System). When used properly, this style planner will serve as a blank canvas for you to work on while developing your own personal styles for use with the WOW System. Simply print this entire document each time you wish to create a new style, then fill in the necessary fields.

Always remember that it is better to be thinking about who you are rather than who you want to be when creating a WOW style. Your focus should be to highlight your strong points and offset your weak areas, not to simply use the techniques that seem to be the best.

Do not feel pressured to fill out everything in this style planner, as it has been designed in a way that will purposely leave you with a good amount of headroom. It is perfectly normal to have quite a bit of empty spaces remaining once you are finished. Filling in every technique slot given will only produce a style so complex that it will not function properly.

Sometimes less equals more. With that in mind, let's begin:

Style Name:

Style Description:

Stage 1

The main goals for stage one are:

- *Identify your target girl or target group.*
- *Make contact with your target(s).*
- *Run an opener (if applicable).*
